10	10/28	11/3									0
11	11/4	11/10									0
12	11/11	11/17									0
13	11/18	11/24									0
14	11/25	12/1									0
15											0
16											0
Total			0	0	9.7	17.5	19.5	0	15	17.5	79.2

Date	Duration (hours)	Category	Description of completed task	Challenges and/or next steps	Reflection
8/29/25	3	Other	I got a new computer so I used this time to download all the necessary softwares and usefull tools I will need for the project		
8/30/25	0.5	Other	Set up github		
9/1/25	2	Research, Training, Lear	I did some research on what exactly I want to do. Originally I wanted to do a personality test where the test help undecided majors see what major would suit them most. I know I would be able to do this so I was thinking about another idea that would definitely take longer. Its a game like wordle but instead of words, you're guessig soccer playes and who scored the goal.	Deciding what project to do	I think I will do the personality test first and then work on the other idea when I have time.
9/1/25	0.5	Other	Updated my resume		
9/3/25	3	Design	Went on figma and did rough sketches on how I want the website to look		
9/3/25	1	Research, Training, Lear	Looked at a youtube video on how to use figma https://youtu.be/ezldKx-jPag?si=LrRBuhrkBKXypA_r		
9/4/25	2	Research, Training, Lear	Researched the most popular majors and what traits they require. For example: Buisness majors are mostly required to be social.		
9/4/25	1	Design	looked for color schemes and potential images I want to use		
9/5/25	2	Research, Training, Lear	I want to use react for my project, I never used so i searched up a youtube tutorial https://youtu.be/SqcY0GlETPk?si=ldgJfzbDZtjh4tmB		
9/6/25	2	Other	Went through my notes from my Human Computer Interaction course.		I want to focus on making the interface as user friendly as I can. I hate bad ui.
9/7/25	3	Other	Survey on brightspace		
9/9/25	3	Coding	Created project folder. Set up index.html, style.css, and script.js. Linked them together		
9/10/25	2	Other	Linked Github repository to VSCode	It took way longer than it needed to, I was having touble signing into github on vscode. Their servers were down	
9/10/25	1	Documentation	Wrote readme file		
9/11/25	1	Research, Training, Lear	Looked at popular quiz apps online like Buzzfeed since they are really popular.		After looking at their quiz I decided that my app will have more images instead of writing.
9/12/25	2	Design	Designed a landing page for the website	This is a draft, I plan on coding the landing page over the weekend	
9/12/25	1	Coding	Quickly just coded the structure (html) of the landing page. (containers)		
9/13/25	4	Coding	Wrote the code for the landing page on vscode	I had trouble with flexbox	
9/13/25	0.5	Research, Training, Lear	Watched a video on responsive grids in css		
9/16/25	1	Documentation	Wrote setup notes for the week, want to orgininze my week so I know what to do when	I'm slowly getting overwelmed with the workload with other classes.	Making a schedule may help me, we will see

Date	Duration (hours)	Category	Description of completed task	Challenges and/or next steps	Reflection
9/16/25	0.7	Design	Played around with some ideas for the quiz layout (figma)	Finding good pictures is the worst part right now lol	
9/17/25	3	Design	Designed (figma) the question page that users will be directed to after pressing "Start quiz"	Draft	
9/18/25	2	Research, Training, Lear	Researched Holland Code which is categorization of work envorments into 6 personality types	I plan on using this theory in my questions to determine majors	
9/19/25	4	Documentation	Wrote sample pseudocode on how I'm going to link the users answers to the majors at the end of the quiz	At first I thought that each answer will have an individual personality trait linked to it, but then that reduced the amount of options for majors. As of now to make it functional I'll leave it like this. change later	
9/21/25	3	Coding	Coded the quiz page (right now it's only for 1 sample question) Not functional		
9/21/25	2	Research, Training, Lear	Found a video about progress bars in javascript, practiced it on a seperate project that I already have done		A progress bar will be benefitial for users to know how far along they are in the quiz
9/23/25	1	Documentation	Created the schedule for the week		
9/23/25	2.5	Coding	Styled the landing page with different color combos to see which one is best		
9/23/25	1	Other	Asked friends and family which styling they prefered		Free focus groups! I love free labor
9/24/25	4	Documentation	Made a detailed list of 15 majors. Each has top skills required for it and career paths for that majors		
9/25/25	2	Documentation	Created a list of 50 questions		This is honestly the worst part...
9/26/25	2.5	Documentation	Wrote the answers for like half of them, it's good for now, enough for testing	Will complete everything else after testing	
9/28/25	4	Other	1st Draft Diagram assingnment on brightspace	Planning the rest of the semester out was a bit difficult but it's good practice	
9/30/25	2	Documentation	Wrote some more questions and answers		
10/1/25	1	Other	Organized repository		
10/1/25	2	Documentation	Edited the list of majors		
10/2/25	4	Coding	Worked on the animations and css for the quiz page.		
10/3/25	2.5	Research, Training, Lear	Determined which major coorelates to which personality type from the Holland Code		
10/5/25	0.5	Other	Demo recording
